

Canon MJ Group 2030 Medium-Term Environmental Targets

Canon MJ Group 2030 Medium-Term Environmental Targets	Fiscal 2023 Result
<p>1. Realization of carbon neutrality</p> <ul style="list-style-type: none"> • 38% reduction in in-house CO₂ emissions (compared with fiscal 2021)※1※2 • Contributing to Customers' CO₂ Reduction through Our Business 	<p>8.4% decrease from fiscal 2021</p> <p>Details of initiatives</p>
<p>2. Contribution to the realization of a resource-recycling society</p> <ul style="list-style-type: none"> • Achieve zero emissions from product waste (recycling rate of 99.9% or more)※3 • Reduce waste by checking the amount of waste in the Group and driving plastic reduction activities. • Reduce water consumption by checking the Group's water consumption and enhancing measures to use water efficiently. • Analyze the Group's water risks and disclose information about them. 	<p>99.9% or higher</p> <p>Details of initiatives</p>
<p>3. Contribution to Biodiversity Conservation and Pollution Prevention</p> <ul style="list-style-type: none"> • Renew social contribution activities aimed at protecting biodiversity. • Eliminate hazardous materials in the supply chain through green procurement 	<p>Details of initiatives</p> <p>Details of initiatives</p>

*1 Calculated using the Science-Based Targets (SBT) Setting Tool provided by the Ministry of the Environment's Green Value Chain Platform

*2 In-house CO₂ emissions are the total Scope 1 and Scope 2 GHG emissions (excluding GHG emissions from non-energy sources).

*3 Recycling rate (rate at which end-of-use products are converted into new resources) = Amount of products disposed of through methods other than landfill disposal ÷ Total amount of products disposed of
